## Lithrone G37 Joins Lithrone G Series Lineup

Komori Corporation (Head Office: Sumida-ku, Tokyo, Japan; Representative Director and President: Satoshi Mochida) announces the development of the Lithrone G37 37-inch sheetfed offset press that joins the Lithrone G series lineup, the cutting-edge technologies and Komori know-how.

Equipped with an evolved version of the KHS-AI integrated control system for quick print start-up, this OffsetOnDemand machine addresses the critical needs of short turnarounds, many different printed products, short runs and low cost.

A compact press that can produce A1-size products, the Lithrone G37 offers a 640 x 940 mm maximum sheet size. Capable of printing sheets up to 37 inches in width, this press has the power to address the full span of requirements in the publishing and commercial printing segments. Since color management can be implemented by including a CMS color bar on sheets even with 8-up A4 or American letter size impositions, this machine is ideal for producing high page-count products with high print quality. Perfect for printing items in the international standard A1 poster size, plus total flexibility in layout criteria such as bindery register marks. The 15,000 sheets per hour maximum printing speed and stable operation afforded by automated systems with KHS-AI at their core make the Lithrone G37 the ultimate high technology machine for outstanding productivity and consistent bottom-line performance.

### <Features>

- Standard KHS-AI handles tight turnarounds, many different printed products, short runs and on-press proofing.
- 15,000 sph maximum printing speed and stable high speed operation over the 0.04–0.6 mm sheet thickness range
- Maximum sheet size of 640 x 940 mm meets a wide range of printing needs.
- Highly reliable OffsetOnDemand machine

\* Model in photograph includes optional specifications. Appearance of the machine may be changed without notice.

### ***About Komori Corporation***

Tokyo-based Komori Corporation, a premier manufacturer of sheetfed / web offset printing and security printing presses, provides world-class technology especially suited for today's highly competitive printing marketplace. Delivering the highest level in print quality coupled with impressively fast makeready and JDF connectivity through open systems architecture, Komori presses help printers achieve higher productivity levels essential for increased margins and business growth.
